We are looking for a

(Junior) Telecom/Network Engineer

Yungo is an international team of engineers driving innovation in FTTH network design. We work with clients across Europe, helping them to plan, optimise and document their fibre broadband networks. We strive to do things differently, thinking outside the box and having fun while we do it.

What will be your main responsibilities?

- Designing telecom networks based on the client’s requirements
- Working with a variety of design and engineering tools (TKI, IMS & more)
- Creating detailed drawings and maps
- Preparing and maintaining As-Built documentation and others

What should the perfect candidate have?

- An engineering degree (Civil/Telco/IT), Masters in GIS also welcome
- Knowledge of AutoCAD, QGIS or similar tools
- Knowledge of TKI, IMS Geostruct, FiberplanIT, PNI Smallworld is a big plus
- Dutch, German or French language is desirable, not a condition
- Ability to work within a team, being proactive
