10 reasons to study Cybernetics and Robotics

1. You will study informatics for application in the real world.
2. Nowadays, robots not only drive on Mars, they are increasingly used in everyday life. Many devices are controlled automatically. Today, everyone has a computer at home, tomorrow everyone will have a robot. Be a part of the process.
3. Our modern labs await you. We have equipped them with funds earned by carrying out research.
4. Our research in cybernetics and robotics is world class. Some of our research teams are world leaders.
5. Courses are taught by experienced researchers from top industrial companies (Honeywell, Rockwell Automation, etc.). Your creativity will be cultivated by young researchers.
6. The Czech Technical University is ranked in the Top 500 world universities in prestigious international ranking. The Faculty of Electrical Engineering makes a large contribution to this high ranking.
7. Our program is flexible. You will not only gain solid foundations but also specialist skills.
8. We open the doors to the world. A graduate of our bachelor study program can go on to take a master’s program anywhere in the world, and our master’s graduates can study for a PhD anywhere. In the same way, our master and PhD programs are open to graduates of a range of programs at universities in the Czech Republic and abroad.
9. Language skills are an integral part of the studies. You will learn from the same textbooks as those used by students at other prestigious world universities.
10. Our graduates are able to adapt, and industry is waiting for them.
**Admission procedure**

Applications for a bachelor program
Applicants must send:

- an application form for admission to the bachelor study program
- a transcript of studies (a list of their study grades) or a notarized copy of their secondary school leaving certificate; Bachelors/Masters applying for a bachelor program can submit a notarized copy of their bachelor/master diploma instead
- proof of payment of the admission procedures fee (CZK 500)

Applications for a master program
Applicants must send:

- an application form for admission to a master study program
- a transcript of studies (list of study grades) or a notarized copy of their bachelor/master diploma (graduates only)
- proof of payment of the admission procedures fee (CZK 500)

All documents are to be submitted not later than the end of May, for enrolment in September.

Address:
Czech Technical University in Prague
Faculty of Electrical Engineering
Study Department
Technická 2, 166 27 Prague 6
Czech Republic

Account No.: 19-5504540257
bank sorting code: 0100
payment identification: 902
variable symbol: 85500
SWIFT code: KOMB CZ PP
IBAN CZ9401000000195504540257

The tuition fee is CZK 55 000 (approx. EUR 2200, USD 3000) per one semester, and must be paid before enrolment. The academic year consists of two semesters.

Details of admissions see http://www.cvut.cz/incomers/regulations.

**Czech Technical University in Prague (CTU)**

CTU in Prague was established on the initiative of Josef Christian Willenberg, on the basis of a foundation deed signed by Emperor Joseph I and dated January 18th, 1707.

We provide high quality education through an extensive portfolio of primarily engineering fields of study, conduct basic and applied research and numerous scientific projects with great emphasis on industrial use and applications. We cooperate closely with domestic and foreign-based institutions.

We educate dynamic future experts, scientists and managers who will be flexible in adapting to the requirements of the market.

---

**Faculty of Electrical Engineering**

The Faculty of Electrical Engineering educates specialists in the field of electrical engineering and informatics through study programs covering electronics, power energy, telecommunications, cybernetics, measurement, control, automation, informatics, computer technology, management and biomedicine.

- Electrical Engineering, Power Engineering and Management
  BSc and MSc
- Communications, Multimedia and Electronics
  BSc and MSc
- Cybernetics and Robotics
  BSc and MSc
- Open Informatics
  BSc and MSc
- Biomedical Engineering and Informatics
  MSc
- Intelligent Buildings
  MSc

Length of the study
BSc = 6 semesters/3 years
MSc = 4 semesters/2 years

We also provide PhD studies in 16 fields of electrical engineering.
